

*Happy Easter
to you and your family!*

Trig's

Thank you for choosing Trig's.

Reheating Instructions:

- Your meal is fully cooked ready to just heat and serve!
- Black trays are both microwave and oven safe up to 350 degrees F
- Plastic lids are not meant for warming and must be removed
- Aluminum trays used for proteins are oven safe. We do not recommend re-heating proteins in the microwave

Spiral Ham

Preheat oven to 250 degrees. Remove the ham from outer wrapper and place cut side down in the aluminum pan provided, loosely cover the ham with foil. Warm for 13 minutes per pound about 1.5 hours. The ham is fully cooked but needs to be warmed through. Cooking at a higher temperature would cause it to dry out. If desired sprinkle ham with glaze packet for an even sweeter taste.

Prime Rib

Rib roasts are fully cooked to 130 °F (rare) internal temperature warming to desired serving temperature is all that is required. Preheat oven to 275 degrees F place roast in roasting pan covered with foil. Heat for 8 minutes per pound or until internal temperature reaches 110 ° - 112 ° F. Remove from the oven and let stand for about 10-15 minutes before slicing.

Scalloped Potatoes

Remove plastic lids from the tray. *Do not broil or use a toaster oven

Microwave: Place in microwave and heat on high 10 minutes until hot (165 degrees F) let stand 2 minutes before serving

Oven: Preheat oven to 350 degrees F. remove plastic film, cover with foil heat place on a baking sheet in the oven 20-25 minutes or until hot (165° F)

Vegetable Sides

Remove plastic lids from the tray.

Microwave: Heat on high 3-5 minutes until hot

Oven: Cover loosely with foil, place on a baking sheet and heat 15-20 minutes until heated through.
